# Best Preparations of H12-711 Exam 2022 HCNA-Security Unlimited 290 Questions [Q26-Q48

Best Preparations of H12-711 Exam 2022 HCNA-Security Unlimited 290 Questions
Focus on H12-711 All-in-One Exam Guide For Quick Preparation.

NO.26 In IPSEC VPN, which of the following scenarios can be applied by tunnel mode?
* between the host and the host
* between hosts and security gateways
* between security gateways
* between tunnel mode and transport mode

NO.27 The matching principle of the security policy is: firstly, find the inter-domain security policy configured manually, and if there is no match, the data packet is directly discarded
* True
* False

NO.28 In the SSL handshake protocol, which of the following message is optional? (Choose two.)

* Server Key Exchange
* ChangeCipherSpec
* Certificate verify
* ServerHelloDone
Explanation/Reference:

NO.29 When you configure a firewall between the domain security policy, if the 192.168.0.0/24 network segment is set to match object, the following configuration, which is correct? (Choose two.)
* policy 1

policy source 192.168.0.0 mask 255.255.255.0
* policy 1

policy source 192.168.0.0 255.255.255.0
* policy 1

policy source 192.168.0.0 mask 0.0.0.255
* policy 1

policy source 192.168.0.0 0.0.0.255

NO.30 In most scenarios, NAT Inbound is used to the enterprise private network users to access the Internet scenario.
* True
* False

NO.31 Electronic evidence preservation is directly related to the legal effect of evidence, in line with the preservation of legal procedures, and its authenticity and reliability are guaranteed. Which of the following is not anevidence preservation technology?
* Encryption technology
* Digital certificate technology
* Digital signature technology
* Message tag tracking technology

NO.32 When establishing their own information systems, companies check each operation according to internationally established authoritative standards and can check whether their information systems are safe
* True
* False

NO.33 Which of the following are multi-user operating systems? (Multiple choice)
* MSDOS
* UNIX
* LINUX
* Windows

NO.34 Which of the following is correct for the command to view the number of security policy matches?
* display firewall sesstion table
* display security-policy all
* display security-policy count
* count security-policy hit

NO.35 Which description about disconnect the TCP connection 4 times-handshake is wrong?

* initiative to shut down the sender first FIN active closed, while theother received this FIN perform passive shut down
* when passive close receipt the first FIN. it will send back an ACK, and randomly generated to confirm the serial number
* passive closing party end need to send a file to the application, theapplication will close it connection and lead to send a FIN
* in passive close the sender after the FIN. initiative to close must send back a confirmation, and will confirm the serial number is set to receive serial number 1

NO.36 Which of the following statement about the L2TP VPN of Clieit-initialized is wrong?
* After the remote user access to internet, can initiate L2TPtunneling request to the remote LNS directly through the client software
* LNS device receives user L2TPconnection request, can verify based on user name and password.
* LNS assign a private IP address for remote users
* remote users do not need to install VPN client software

NO.37 Which of the following is the encryption technology used by digital envelopes?
* Symmetric encryption algorithm
* Asymmetric encryption algorithm
* Hash algorithm
* Stream encryption algorithm

NO.38 Which of the following is the correct description of windows log event type? (Multiple Choice)
* A warning event is a successful operation event of an application, driver, or service.
* Error events usually refer to the loss of function and data. For example, if a service cannot be loaded as a system boot, an error event will be generated.
* When the disk space is insufficient, it will be recorded as an “information event”
* Failure audit event refers to a failed audit security login attempt, such as a failure when the user view accesses the network drive is logged as a failed audit event.

NO.39 The process of electronic forensics includes: protecting the site, obtaining evidence, preserving evidence,identifying evidence, analyzing evidence, tracking and presenting evidence
* True
* False

NO.40 The configuration commands for the NAT address pool are as follows: nat address-group 1 section 0 202.202.168.10 202.202.168.20 mode no-pat Of which, the meaning of no-pat parameters is:
* Do not do address translation
* Perform port multiplexing
* Do not convert the source port
* Do not convert the destination port

NO.41 Which of the following description is wrong about the Internet users and VPN access user authentication?
* The Internet user andthe VPN access user share data, and the users attribute check (user status, account expiration time, etc.) also takes effect on the VPN access.
* The local authentication or server authentication process is basically the same for the Internet users. The authentication is performed on the user through the authentication domain.
* After the VPN user accesses the network, it can access the network resources of the enterprise headquarters. The firewall can control the accessible network resources based on theuser name.
* After the VPN access user passes the authentication, it will be online on the user online list.

NO.42 Execute the command on the firewall and display the following information, which of the following description is correct? (Multiple Choice) HRP_A [USG_A] display vrrp interfaceGigabitEthernet 0/0/1 GigabitEthernet9/0/1 | Virtual Router 1VRRP Group: Active state: Active Virtual IP: 202.38.10.1 Virtual MAC: 0000-5e00-0101 Primary IP: 202 38.10.2 PriorityRun: 100

PriorityConfig: 100 MasterPriority: 100 Preempt: YES Delay Time: 10
* The status of this firewall VGMP group is Active.
* This firewall G1 / 0/1 virtual interface IP address 202.30.10.2
* This firewall VRID is 1 the VRRP priority to backup g’oup 100
* Will not switch when the primary device fails

NO.43 Which of the following descriptions about IKE SA is wrong?
* IKE SA is two-way
* IKE is a UDP- based application layer protocol
* IKE SA servers for IPSec SA
* The encryption algorithm used by user data packets isdetermined by IKE SA.

NO.44 Terminal security access control can support? (Choose three.)
* SACG hardware (hardware security access control gateway)
* 802.1X
* ARP control
* Software SACG (host firewall)
Explanation/Reference:

NO.45 Which of the following description is correct about the sort of the call setup process for L2TP corridors?

1. L2TP tunnel

2. PPP connection

3. LNS authenticates users

4. Users accessintranet resources

5. Establish an L2TP session
* 1->2->3->5->4
* 1->5->3->2->4
* 2->1->5->3->4 T

NO.46 Data analysis technology is to find and -natch keywords or key ohrases in the acquired data stream or information flow, and
analyze: he correlation of time. Which of the following is not an evidence analysis technique?
* Password deciphering, data decryption technology
* Document Digital Abstract Analysis Technology
* Techniques for discovering the connections between different evidences
* Spam tracking technology

NO.47 Which VPN access modes are suitable for mobile office workers? (Choose three.)
* GRE VPN
* L2TP VPN
* SSL VPN
* L2TP over IPsec

NO.48 What are the following values can be set as in USG series firewall security level definition from the security zone? (Choose
two.)
* 150

* 100
* 80
* 40
