Best Way To Study For Huawei H13-821_V2.0-ENU Exam Brilliant H13-821_V2.0-ENU Exam Questions PDF
Updated Verified Pass H13-821_V2.0-ENU Exam - Real Questions and Answers

NO.366 Huawei Cloud tenants need to pay attention to the resource utilization of cloud container clusters.

- * True
- * False

NO.367 Continuous integration, continuous delivery, continuous deployment, and automation are the core concepts of DevOps. Which function in HUAWEI CLOUD DevCloud supports the implementation of the above concepts?

- * Compile and build services
- * Deployment service
- * Pipeline service
- * Code hosting service
- * Project management services

NO.368 Huawei Cloud Distributed Database Middleware DDM service can achieve transparent read and write separation.

- * True
- * False

NO.369 Microservices under the microservices architecture naturally support DevOps, and microservices complement DevOps. DevOps requires the development, testing and operation of business components by a two pizzas team, rapid iteration, and

continuous delivery.

- * True
- * False

NO.370 What data access interfaces can Huawei Cloud Distributed Message DMS service provide? (Multiple choice)

- * HTTP Restful Apl
- * TCP SDK
- * Kafka SDK
- * sql interface

NO.371 Tenants need to upload 100TB of data to HUAWEI CLOUD. Which of the following services is recommended for tenants to complete data transmission?

- * Cloud Disk EVS
- * Data Express Service DES
- * Elastic File Service SFS
- * Object storage service OBS

NO.372 Which of the following Huawei Cloud services are not in the scope of PaaS? (Multiple choice)

- * DevCloud
- * ECS
- * Cloud Desktop
- * ServiceStage

NO.373 Which benefits can the application of zero transformation of enterprise cloud solutions bring? (Multiple choice)

- * Improve resource utilization
- * Rolling deployment, grayscale release
- * Automated deployment, high efficiency, low error rate
- * Automated monitoring operation and maintenance service

NO.374 What is the role of the edge cloud application integration ROMA platform in the enterprise hybrid cloud architecture? (Multiple choice)

- * Enterprise cloud on-cloud service capability collaboration network
- * Data and applications
- * Channel for data collection to the cloud
- * CDR integration

NO.375 In Huawei Cloud's three-dimensional O&M solution, O&M personnel only need to pay attention to whether the application functions are normal, and do not need to pay attention to user experience.

- * True
- * False

NO.376 Which one of the end-side devices currently supported by the HiLens platform is not included?

- * All HiSilicon chip equipment
- * Android devices
- * HiLens Kit
- * Non-Hisilicon chip camera

NO.377 Tenants need to build mapping applications. Which of the following types of elastic cloud server instances are recommended for tenants?

- * G5

- * M6
- * T6
- * I3

NO.378 Which of the following is the value that the full-stack exclusive solution brings to customers? (Multiple choice)

- * Private car compliance: physical isolation can be audited to meet customer security compliance requirements for cloud business
- * Simple operation and maintenance: customers and Huawei cloud layered operation and maintenance, Huawei provides platform management professional operation and maintenance services, reducing customer operation and maintenance costs
- * Technology leadership: service capabilities are synchronized with Huawei's public cloud to maintain technology leadership
- * Development collaboration: Provide APIs and management tools consistent with Huawei's public cloud to reduce customer development and adaptation costs

NO.379 Which of the following is the goal of the microservice engine CSE?

- * Microservice operation and maintenance lifecycle management
- * Microservice on-line lifecycle management
- * Microservice development lifecycle management
- * Microservice full lifecycle management

NO.380 Which of the following types of protocols does the listener of the ELB instance support? (Multiple choice)

- * HTTP/HITPS
- * ICMP
- * UDP
- * TCP

NO.381 On the topology map of Huawei cloud application operation and maintenance, different colors represent the health of the instance. The color is determined by the Apdex value. The closer the Apdex value is to 1, the healthier the application is. If an application instance is not called by other applications, then its color is:

- * Gray
- * Yellow
- * Green
- * Red

NO.382 What are the components that contain application construction and configuration information when publishing Docker-based container applications?

- * Docker image
- * Docker registry
- * Dockerfile
- * Docker Hub

NO.383 A tenant needs to launch an explosive game and wants to use an instance with ultra-high performance and ultra-strong network. It is recommended that the tenant purchase a C6 series of elastic cloud server instances.

- * True
- * False

NO.384 In the Internet identity verification scenario, which of the following can be used to prevent cheating attacks?

- * Face database management
- * Face search
- * Live detection
- * Face comparison

NO.385 Which of the following are the key features of DDM services? (Multiple choice)

- * Uninterrupted business, automatic horizontal splitting and smooth expansion
- * Can withstand PB-level data volume, millions-level concurrency, ten times that of a single-machine database connection
- * The cluster is highly available and can automatically recover from failures in seconds
- * Compatible with MySQL protocol
- * Compatible with Oracle protocol

NO.386 Which of the following types can Blockchain be divided into from the perspective of access and management? (Multiple choice)

- * Side chain
- * Public chain
- * Alliance chain
- * Private chain

NO.387 HUAWEI CLOUD provides a complete set of SAP cloud solutions, including SAP full production system cloud, development and test environment cloud, disaster recovery system cloud, SAP exclusive cloud and other solutions.

- * True
- * False

NO.388 A table with 1 billion data records is running in the tenant's RDS instance. The delay time is long when executing SELECT related query statements. The tenant hopes to solve the problem of slow query performance through DDM. What kind of table is selected and recommended to be created on DDM by the tenant?

- * Aggregate table
- * Fragmentation table
- * Global table
- * Single table

NO.389 Regarding the description of the use and operation of HUAWEI CLOUD Security Services, which of the following statements are correct? (Multiple choice)

- * The vulnerability scanning service detects vulnerabilities and needs to be analyzed and processed as soon as possible based on the actual business situation
- * It is detected in WAF that normal business requests have been blocked by mistake, and exception rules can be configured for processing
- * After the host security detects the existence of a weak password account in the host system, the administrator should promptly modify the password
- * There is no available system host security quota, which will cause the host security protection to be unavailable

NO.390 Which of the following descriptions about Kubernetes is wrong?

- * Kubernetes is Google's open source container cluster management system, built on Docker technology
- * Kubernetes cannot manage the life cycle of containers
- * Kubernetes provides cross-node service discovery and load balancing
- * Kubernetes's self-healing mechanism makes the container cluster always run in the state expected by users
