Verified NSE6_FAC-6.1 dumps Q&As on your NSE 6 Network Security Specialist Exam Questions Certain Success!

NEW QUESTION 16

When you are setting up two FortiAuthenticator devices in active-passive HA, which HA role must you select on the masterFortiAuthenticator?

- * Active-passive master
- * Standalone master
- * Cluster member
- * Load balancing master

NEW QUESTION 17

You are the administrator of a large network that includes a large local user database on the current Fortiauthenticator. You want to import all the local users into a new Fortiauthenticator device.

Which method should you use to migrate the local users?

- * Import users using RADIUS accounting updates.
- * Import the current directory structure.
- * Import users from RADIUS.
- * Import users using a CSV file.

NEW QUESTION 18

Which two capabilities does FortiAuthenticator offer when acting as a self-signed or local CA? (Choose two)

- * Validating other CA CRLs using OSCP
- * Importing other CA certificates and CRLs
- * Merging local and remote CRLs using SCEP
- * Creating, signing, and revoking of X.509 certificates

NEW QUESTION 19

Which two protocols are the default management access protocols for administrative access for FortiAuthenticator? (Choose two)

- * Telnet
- * HTTPS
- * SSH
- * SNMP

NEW QUESTION 20

Which two are supported captive or guest portal authentication methods? (Choose two)

- * LinkedIn
- * Apple ID
- * Instagram
- * Email

NEW QUESTION 21

Which of the following is an OAuth-based standard to generate event-based, one-time password tokens?

- * OLTP
- * SOTP
- * HOTP
- * TOTP

NEW QUESTION 22

Which option correctly describes an SP-initiated SSO SAML packet flow for a host without a SAML assertion?

- * Service provider contacts identity provider, identity provider validates principal for service provider, service provider establishes communication with principal
- * Principal contacts identity provider and is redirected to service provider, principal establishes connection with service provider, service provider validates authentication with identity provider
- * Principal contacts service provider, service provider redirects principal to identity provider, after successful authentication identity provider redirects principal to service provider
- * Principal contacts identity provider and authenticates, identity provider relays principal to service provider after valid authentication

NEW QUESTION 23

What are three key features of FortiAuthenticator? (Choose three)

- * Identity management device
- * Log server
- * Certificate authority
- * Portal services
- * RSSO Server

NEW QUESTION 24

Which statement about the guest portal policies is true?

- * Guest portal policies apply only to authentication requests coming from unknown RADIUS clients
- * Guest portal policies can be used only for BYODs
- * Conditions in the policy apply only to guest wireless users
- * All conditions in the policy must match before a user is presented with the guest portal

NEW QUESTION 25

You are a Wi-Fi provider and host multiple domains. How do you delegate user accounts, user groups and permissions per domain when they are authenticating on a single FortiAuthenticator device?

- * Automatically import hosts from each domain as they authenticate
- * Create multiple directory trees on FortiAuthenticator
- * Create realms
- * Create user groups

NEW QUESTION 26

Which two statements about the RADIUS service on FortiAuthenticator are true? (Choose two)

- * Two-factor authentication cannot be enforced when using RADIUS authentication
- * RADIUS users can be migrated to LDAP users
- * Only local users can be authenticated through RADIUS
- * FortiAuthenticator answers only to RADIUS clients that are registered with FortiAuthenticator

NEW QUESTION 27

You are a FortiAuthenticator administrator for a large organization. Users who are configured to use FortiToken 200 for two-factor authentication can no longer authenticate. You have verified that only the users with two-factor authentication are experiencing the issue.

What can cause this issue?

- * One of the FortiAuthenticator devices in the active-active cluster has failed
- * FortiAuthenticator has lost contact with the FortiToken Cloud servers
- * FortiToken 200 license has expired
- * Time drift between FortiAuthenticator and hardware tokens
