

## [May-2022 Network Appliance NS0-003 Dumps - Secret To Pass in First Attempt [Q38-Q60]

[May-2022] Network Appliance NS0-003 Dumps - Secret To Pass in First Attempt  
Network Appliance NS0-003 Exam Dumps [2022] Practice Valid Exam Dumps Question

NetApp NS0-003 Exam Topics: **Section Objectives** Infrastructure Concepts- Identify basic infrastructure concepts

- Identify data governance concepts
- Identify virtualization concepts  
NetApp Data Storage Software-Identify NetApp Element, NetApp ONTAP, NetApp StorageGRID, NetApp SANtricity  
NetApp Hybrid Cloud Value Proposition-Describe the business benefits of the NetApp Data Fabric
- Identify the consumption model options for NetApp Hybrid Cloud solutions  
NetApp Cloud Solutions- Describe NetApp Cloud Manager tools
- Describe the NetApp data mobility solutions
- Identify NetApp cloud data protection
- Describe NetApp Cloud Storage
- Describe NetApp Cloud Services

## NetApp NS0-003 Exam Certification Details:

Duration 90 minutes  
Number of Questions 60  
Sample Questions NetApp NS0-003 Sample Questions  
Exam Registration PEARSON VUE

**NO.38** You want to make efficient use of your disk storage and save money by tiering your infrequently accessed data to a less expensive object store. Which NetApp technology enables you to satisfy these requirements?

- \* FabricPool
- \* SnapVault
- \* SnapMirror
- \* FlexCache

**NO.39** What are two elements of the Azure NetApp Files hierarchy? (Choose two.)

- \* encryption
- \* volume
- \* capacity
- \* tier

**NO.40** Which Cisco-validated design (CVD) is built upon the Cisco Unified Computing System (Cisco UCS), the Cisco Nexus family of switches, and NetApp storage controllers (FAS or AFF)?

- \* FlexPod
- \* E-Series
- \* StorageGRID
- \* HCI

**NO.41** Which technology enables the use of nonvolatile persistent memory to tier data on a client?

- \* MAX Data
- \* FlexCache
- \* Flash Cache
- \* FlexPool

**NO.42** You want to maintain a longer retention time of your Snapshot copies on a NetApp ONTAP system in a remote data center versus the NetApp ONTAP system in your primary data center.

Which NetApp ONTAP feature enables you to accomplish this task?

- \* FlexGroup volume
- \* SnapCenter
- \* SnapVault
- \* SnapLock

**NO.43** Which two data protection features are built into NetApp Element software? (Choose two.)

- \* volume snapshots
- \* RAID DP
- \* real-time replication between clusters
- \* SnapLock software

**NO.44** Which service does Cloud Volumes ONTAP tiering use?

- \* Azure Stack

- \* Azure Queue Storage
- \* Azure Data Lake Storage
- \* Azure Blob

**NO.45** Which three NetApp data mobility products are used to migrate data into the cloud? (Choose three.)

- \* XCP
- \* robocopy
- \* SnapMirror
- \* Cloud Sync
- \* rsync

**NO.46** Which attribute of a host is used to route packs to a non-local subnet?

- \* VLAN trunk
- \* default gateway
- \* NTP server
- \* DNS server

**NO.47** Your employer asks you to deploy a solution in the cloud for sharing files company-wide. Employees require optimal performance and transparent data access to a single set of data.

In this scenario, which NetApp technology would you deploy?

- \* Global File Cache
- \* ONTAP Select
- \* StorageGRID
- \* Cloud Sync service

**NO.48** You want your developers to be able to request storage on private and public cloud locations using a single API endpoint.

In this scenario, which NetApp service provides this capability?

- \* Cloud Manager
- \* Cloud Sync
- \* Cloud Volumes ONTAP
- \* Cloud Volumes Services

**NO.49** What are two benefits of NetApp FabricPool technology? (Choose two.)

- \* to reclaim capacity on primary storage
- \* to enable ease-of-use data migration to the cloud
- \* to allow simple disaster recovery from primary to secondary locations
- \* to allow high-performance storage to be used for active (hot) data

**NO.50** Which two technologies enable business continuity during a site failure? (Choose two.)

- \* MetroCluster
- \* StorageGRID
- \* SnapLock
- \* Snapshot copies

**NO.51** When creating a StorageGRID solution with two sites, how many storage nodes are required?

- \* at least three nodes per site
- \* at least four nodes in total
- \* at least two nodes per site

- \* at least one node per site

**NO.52** Which two resources are provisioned when you deploy Cloud Volumes ONTAP in Azure? (Choose two.)

- \* Azure Queue Storage
- \* Azure Managed Disks
- \* Azure Blob
- \* Azure Files

**NO.53** You are asked to ensure that OnCommand Cloud Manager automatically provisions additional storage for your Cloud Volumes ONTAP system.

Which OnCommand Cloud Manager feature enables you to accomplish this task?

- \* automatic capacity management
- \* advanced allocation
- \* data tiering
- \* WQM storage

**NO.54** You want to use Azure NetApp Files to create a volume in an existing capacity pool-In this scenario, which statement about volumes is true?

- \* A volume can be moved to another capacity pool, but only In the same region.
- \* A volume can be moved to another capacity pool, but only In the same NetApp account.
- \* A capacity pool can contain multiple volumes.
- \* A volume can be In multiple capacity pools at the same time.

**NO.55** What are three types of data access? (Choose three.)

- \* cloud
- \* object
- \* RAID
- \* block
- \* file

**NO.56** Regarding system high availability, what is the reference used to determine reliability?

- \* the number of data network components available between the data and the user, measured in packet per second (PPS)
- \* the amount of data available to users and how quickly they can access it, measured in IOPS
- \* the number of nines; for example, two nines (99), three nines (99.9), four nines (99.99), and five nines (99.999)
- \* the number of hard drives available in a system, with more drives indicating more reliability

**NO.57** Which statement is correct about Cloud Volumes ONTAP systems and ONTAP clusters, before you can replicate data between them?

- \* The source volume has been taken offline.
- \* The source and destination volumes are running compatible ONTAP versions.
- \* The volume names on both the source and the destination are the same.
- \* The destination volume has all of the storage efficiency settings disabled.

**NO.58** What are three benefits provided by the Spot by NetApp portfolio? (Choose three.)

- \* continuously optimizes cloud resources
- \* replicates data to other clouds
- \* reduces cloud infrastructure costs
- \* scales Windows Virtual Desktops in Azure
- \* avoids service disruption

**NO.59** Which storage type provides access using Amazon S3 APIs?

- \* object
- \* NAS
- \* inode
- \* SAN

<https://docs.aws.amazon.com/AmazonS3/latest/userguide/storage-class-intro.html>

**NO.60** Which ONTAP-native encryption type is supported with Cloud Volumes ONTAP?

- \* NVE
- \* NSE
- \* RSA
- \* AES
