There are 2 correct answers to this question.

Response:

- * SQL Script
- * SQL
- * GraphScript
- * Cypher Query Language

Scope of SAP C_HANAIMP_17: SAP Certified Development Associate - SAP HANA 2.0 SPS05 Exam

Both SAP certifications are eligible through the Credential Hub as Cloud Certifications and can be booked using the product code CER006. You will take up to six exam attempts of your choosing in one year with CER006 - SAP Certification in the Cloud - from anywhere and whenever it fits you! Individual test days may be selected and scheduled.

Each credential has its own collection of strategies for readiness. They are referred to as ?Topic Areas? which can be included in the exam descriptions. You will figure out how many problems there will be on the exam, how long it will take, what topics you will be checked on, and what course work and material you can study. Unscored objects can be seen on certification tests that are being reviewed for future versions of the exam. These unscored objects are dispersed around the qualification topics at random and are not factored into the final ranking. When unscored objects are included, the cumulative amount of items for an inspection as advertised in the Training Shop is never surpassed.

Please keep in mind that the professional-level degree often necessitates many years of on-the-job training and covers real-world situations. This credential verifies the fundamental skills required to serve as a SAP contractor, meaning that the applicant is capable of practically implementing the knowledge acquired through SAP C HANAIMP 17 preparation and project experience. The perfect preparation content for the exam is **C HANAIMP 17 practise tests**.
