2022 Updated Verified IIBA-AAC Q&As - Pass Guarantee or Full Refund
[Jul-2022] IIBA-AAC Certification with Actual Questions from TopExamCollection

What Domains Are Covered by AAC Exam? **You need to put maximum effort to get a better understanding of how Agile analysis works alongside the project lifecycle. After perusing the AAC exam blueprint you will be familiar with domains that are part of the actual test. Once you prepare for these topics, you can ace the exam easily:** - Initiative Horizon 25%;- Agile Mindset 30%;- Strategy Horizon 10%;- Delivery Horizon 35%.

What Is IIBA AAC Exam?

Such an exam is aligned with the Agile Extension to the BABOK Guide and helps the candidate to demonstrate their skill set and knowledge about the Agile analysis business requirements. Overall, there are a total of 85 scenario-based and multiple-choice questions that you have to attempt within 2 hours. At the time of registration, you will be required to pay the exam fee, which is $250, $375, $225 for members, non-members, and corporate members, respectively. To add more, on the final test day, you need to have access to the Internet as the AAC is an online exam that requires a webcam, computer, and microphone. In a nutshell, this test helps the candidate to demonstrate his/her analysis skills and expertise in Agile analysis.

NEW QUESTION 15

The following can be described as a critical differentiator for work in an agile context related to backlog refinement:
* Stakeholder feedback
* Management approval
* Using user stories
* Team feedback
Explanation/Reference: https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member- Copy.pdf (64)

NEW QUESTION 16

The team is prioritizing stories in the backlog and discussing the elements that result in a well-structured, actionable backlog. They identify the following as a central consideration:
* Accessibility of key stakeholders for signoff
* Rapid delivery of value
* Refining the personas used
* How many features are in the backlog
Explanation/Reference: https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member- Copy.pdf (55)

NEW QUESTION 17

The team is struggling with how to best design and explore options for moving forward. They settle on a time-boxed research approach which is often referred to as a:
* Simulation
* Wasteful
* Spike
* Incremental

NEW QUESTION 18

The team is prioritizing stories in the backlog and discussing the elements that result in a well-structured, actionable backlog. They identify the following as a central consideration:
* Accessibility of key stakeholders for signoff
* Rapid delivery of value
* Refining the personas used
* How many features are in the backlog

NEW QUESTION 19

While working at the strategy level, the team needs to ensure stakeholders actively support an environment for constructive communication, collaboration, and continuous improvement. They decide to use the following to achieve this goal?
* Product Roadmap
* Reviews
* Behavior driven development
* Release Plans

NEW QUESTION 20

Good analysis practices at the Strategy Horizon facilitate the transfer of relevant knowledge between teams to:
* Better understand what features will be delivered
* Cancel initiatives that no longer provide value
* Stimulate collaboration and continuous improvement.
* Prioritize and sequence features for delivery

NEW QUESTION 21

The team will be performing its first review and trying to determine what should be demonstrated. After a lengthy discussion they decide to demonstrate:
* Their response to critical customer feedback
* Key lines of code that describe the solution
* Slides of screens to be developed
* An increment of the working solution
Explanation/Reference: https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member- Copy.pdf (97)

NEW QUESTION 22

The sponsor is reviewing data from a new product launch and is evaluating threats and opportunities. What are the three options when evaluating the next steps?
* Run a planning workshop, sequence future planning workshops, create business model canvas for all initiatives
* Start a new initiative, change resources for existing initiatives, cancel an existing initiative
* Distribute marketing surveys for customer feedback, gather internal feedback from the past delivery release, and re-evaluate product attributes
* Run an experiment for the next product launch, set cost/benefit of future initiatives, delay decision making
Explanation/Reference: https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member- Copy.pdf (34)

NEW QUESTION 23

Members of the team facilitate key stakeholders through an exercise to develop a mutual understanding of what is in and out of scope for the initiative and specify the organization value to achieve in the initiative. What technique did they use?
* Sprint Goals
* Visioning
* Purpose Alignment Model
* Story elaboration
Explanation/Reference: https://www.visual-paradigm.com/scrum/write-sprint-goal/

NEW QUESTION 24

The team is expanding and refining customer scenarios as the solution components are being developed. This is an application of the following agile business analysis principle:
* Understand what is doable
* Avoid waste
* Stimulate collaboration and continuous improvement
* Get Real Using Examples
Explanation/Reference: https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member-Copy.pdf (21)

NEW QUESTION 25

After a lengthy discussion the team agrees that the agile business analysis principle of ?get real using examples? aligns with the BACCM core concept of:

* Need
* Value
* Stakeholder
* Solution

Explanation/Reference: https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member-Copy.pdf (22)

NEW QUESTION 26

In situations where learning is frequent and fast-paced, and the product owner is reacting to the new information, the prioritization of solution components should be expected to:

* Be unaffected
* Remain stable
* Alter intermittently
* Change frequently

NEW QUESTION 27

When teams use relative estimating, an important outcome of this technique is:

* Clarity from discussing discrepancies in estimating to uncover assumptions
* Consensus with the tech lead on accurate estimates
* Eliminating outliers and adopting the most common estimate
* Increased velocity by agreeing on higher estimate values

NEW QUESTION 28

The team is discussing one of the six key terms used to discuss both business analysis and its relationship with common terminology. Specifically, they are describing improvements as being deliberate and achieved though business analysis. This team is discussing the:

* Solution
* Need
* Context
* Change

Explanation

Explanation:

Change is the act of transformation in response to a need. Change works to improve the performance of an enterprise. These improvements are deliberate and controlled through business analysis activities.

NEW QUESTION 29

When recommending solution options at the Initiative Horizon, the team decides that their goal is to provide decision makers with:

* The exact cost and timeframe options will take to complete
* Just enough information to make an informed and accurate decision
* The list of stakeholders that are allowed to have input
* Everything known about the resource team doing the delivery

NEW QUESTION 30

The team establishes ground rules for considering business analysis performance improvements. They agree that speed and accuracy of executing analysis activities becomes very important at the following horizon:

* Feedback horizon
* Strategy horizon
* Initiative horizon
* Delivery Horizon

Explanation/Reference: https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member- Copy.pdf (133)

NEW QUESTION 31

The team discusses the agile principle of avoiding waste and decide it?s important because it allows the team to:

* Verify that the budget is aligned with spending
* Focus on items that contribute to satisfying the need
* Ensure clear and effective communication
* Demonstrate ongoing quality backlog refinement

Explanation/Reference: https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member-Copy.pdf (21)

NEW QUESTION 32

The team is struggling with how to best design and explore options for moving forward. They settle on a time-boxed research approach which is often referred to as a:

* Simulation
* Wasteful
* Spike
* Incremental

Explanation/Reference: https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member- Copy.pdf (99)

NEW QUESTION 33

The delivery team is:

prioritizing the backlog

focusing on stories that deliver maximum value first

maximizing the work not done.

These demonstrate application of the following agile business analysis principle:

* Customer collaboration over contract negotiation
* Stimulate collaboration and continuous improvement
* Think as a customer
* Avoid waste

NEW QUESTION 34

The following type of learning and feedback could result in identifying new items for the backlog:

* Velocity metrics and retrospective results
* Flow metrics and testing results
* Burndown chart and management feedback

* Impact metrics and stakeholder feedback

NEW QUESTION 35

The team is discussing one of the six key terms used to discuss both business analysis and its relationship with common terminology. Specifically, they are describing improvements as being deliberate and achieved though business analysis. This team is discussing the:
* Solution
* Need
* Context
* Change
Explanation

Change is the act of transformation in response to a need. Change works to improve the performance of an enterprise. These improvements are deliberate and controlled through business analysis activities.

NEW QUESTION 36

The team is considering which of several solution paths they should invest in. They are working only from conjecture and opinion, not data and facts. A practitioner with an agile mindset would remind them to:
* Perform a value analysis of real options
* Discover what works by trying things out
* Consider analysis at multiple horizons
* Collaborate more to create new ideas

NEW QUESTION 37

Wanting to ensure the delivery team is working as productively as possible, they decide backlog items, including user stories, should be:
* Fully detailed before they get prioritized
* Refined and elaborated by the Tech Lead
* Refined and elaborated throughout the planning horizons
* Fully detailed as they enter the backlog
Explanation/Reference: https://www.agilealliance.org/wp-content/uploads/2017/08/AgileExtension_V2-Member-Copy.pdf (12)
