Juniper JN0-104 Exam Syllabus Topics:

TopicDetailsTopic 1- Describe monitoring or maintenance procedures for a Junos device- Effect of policies on routes and routing tablesTopic 2- Describe how to configure basic components of a Junos device- Network tools, such as ping, traceroute, telnet, SSH, and so onTopic 3- Advantages of and use cases for dynamic routing protocols- Layer 2 addressing, including address resolutionTopic 4- Unicast reverse-path-forwarding (RPF)- Collision domains and broadcast domainsTopic 5- Interface types and properties- Function of routers and switchesTopic 6- Viewing, comparing, and loading configuration files - Active versus candidate configurationTopic 7- Identify the concepts, operation or functionality of the Junos OS user interface- Subnetting and supernettingTopic 8- Describe how to configure or monitor routing policies and firewall filters on a Junos device- Identify basic routing concepts or functionality for Junos devicesTopic 9- Identify methods of monitoring or maintaining Junos devices- Identify the concepts, benefits or functionality of the core elements of the Junos OS

NEW QUESTION 61

Which of these is true about the rescue configuration file? (Choose two)

* For added security, it is recommended to include a root password.
* It is updated automatically when you commit.
* It can be recovered by issuing the command rollback 50
* It is created by issuing the command request system configuration rescue save

NEW QUESTION 62

Which of these commands can be used to display output one page at a time?

* user@router> show interfaces | display
* user@router> show interfaces | trim
* user@router> show interfaces | no-more
* user@router> show interfaces

NEW QUESTION 63

What are three characteristics of Layer 2 switches? (Choose Three)

* Layer 2 switches separates multicast domains.
* Layer 2 switches separates collision domains.
* Layer 2 switches forward traffic addressed to hosts that reside on the same collision domain.
* Layer 2 switches forward traffic addressed to hosts that reside on a different collision domain.
* Layer 2 switches forward broadcast traffic.

NEW QUESTION 64

Which command allows you to verify the syntax and consistency of your configuration without actually activating your configuration?

* User Interfaces
* commit verify
* commit check
* check commit
* commit no-activate

NEW QUESTION 65

Which two statements are true of login classes?

* Users can be members of multiple login classes.
* Login classes define authorization parameters for a user.
* There are five system-defined login classes.
* Login class permission flags can be overridden for certain commands.

NEW QUESTION 66

Which of these are benefits of the modular design of Junos? (Choose two)

* Each module runs in it’s own protected memory space.
* Each module uses specialised hardware.
* Each module can be restarted separately.

NEW QUESTION 67

Which two statements are true about the inet.0 routing table?

* it is used for populating the Ethernet switching table
* it stores information learned from routing protocols and other sources
* it is used for populating the forwarding table
* it is used for populating the forwarding policy

NEW QUESTION 68

Which three statements describe the Transmission Control Protocol (TCP)? (Choose three.)

* TCP is a transport layer protocol.
* TCP is faster than the User Datagram Protocol (UDP).
* TCP provides delivery notification and error-checking mechanisms.
* TCP uses a best-effort delivery approach.
* TCP application examples include HTTP and SMTP.

NEW QUESTION 69

When multiple users are editing the configuration on a Junos device.

What is the default behavior when a user issues a commit command?

* The user’s configuration changes are committed, other users configuration changes are still pending
* The user’s configuration changes are committed, other users will be exited from the configuration mode
* All valid configuration changes made by all users will take effect
* The user will receive an error message disallowing a commit of the configuration

NEW QUESTION 70

Host A is communicating with Host B through a Layer 2 switch.

What is the highest layer that the switch will inspect the traffic in this scenario?

* Data Link
* Transport
* Network
* Session

NEW QUESTION 71

Which of these steps are part of the root password recovery process? (Choose three)

* Reset the root password.
* Reset the user passwords.
* Run the recovery script.
* Reboot the device.
* Load factory-default configuration

NEW QUESTION 72

When using keyboard shortcuts, which keystroke combination allows users to erase a single word to the left of the cursor?

* Ctrl + a
* Ctrl + e

* Ctrl + u
* Ctrl + w

NEW QUESTION 73

Which of these about optical networks are true? (Choose two)
* SONET and SDH both use time-division multiplexing
* SONET and SDH both use wavelength-division multiplexing
* Optical transport network uses wavelength-division multiplexing
* Optical transport network uses time-division multiplexing

NEW QUESTION 74

Which keystroke combination will allow you to erase a single word to the left of the cursor?
* Ctrl + e
* Ctrl + a
* Ctrl + w
* Ctrl + u

NEW QUESTION 75

Referring to the exhibit.

Which dynamic routing protocol would be used for this topology?
* IGMPv3
* OSPFv2
* RIP
* RIPng
