Download Latest HPE2-W02 Dumps with Authentic Real Exam Questions Authentic HPE2-W02 Exam Dumps PDF - Sep-2022 Updated NEW QUESTION 19

What is one trend that is driving customers toward new network management solutions?

- * Customers require more expertise and specialization from their IT staff
- * Savings in other area have freed up IT budget for network management
- * Customers increasingly demand that IT responds to business needs
- * IT organizations are becoming more segmented and isolated

NEW QUESTION 20

For which scenario are Aruba Instant APs the recommended wireless solution?

- * a home office that needs a simple way to connect to a corporate office
- * a branch office that needs a simple deployment
- * an enterprise that needs automation and centralized management
- * an enterprise that needs bluetooth for location-based services

NEW QUESTION 21

Which Aruba solution provides location-based services and analytics?

- * Provision ASIC
- * Mobility Master
- * ClearPass
- * Meridian

NEW QUESTION 22

You are selling an Aruba wireless solution to a healthcare organization. The customer now mentions these additional pain points:

- * Nurses and other staff are wasting time searching for equipment.
- * Staff doesn't know when wheelchairs are left in other departments.

Based on these specific pain points, what additional solution should you recommend?

- * Aruba Central
- * Aruba Meridian and beacons
- * Aruba asset tracking tags
- * Aruba Analytics Location Engine (ALE)

NEW QUESTION 23

What business benefit does Aruba AirMatch provide?

- * better load balancing and availability for controllers
- * enhanced user experience in dense environments
- * simpler troubleshooting with AP and client tracking
- * better security through matching policies on wireless and wired

NEW QUESTION 24

You have already determined that a customer has a distributed enterprise.

Which question will help qualify the customer for the Aruba SD-Branch solution?

- * Do you use a SIEM today, and is it satisfying your needs for scalability and attack detection?
- * Have you considered using MPLS to reduce costs?
- * How do you access cloud services, and what issues are you seeing with your current router?
- * Which branches experience the smallest and highest traffic loads?

Explanation/Reference: <https://www.arubanetworks.com/solutions/sd-branch/>

NEW QUESTION 25

What is one distinguishing feature of Aruba NetInsight and User-centric Service Assurance?

- * They help improve customer engagement by providing a customizable Wi-Fi portal.
- * They help to analyze customer usage patterns over a certain period of time so that companies can improve marketing campaign success.
- * They help IT to simplify policy enforcement by enhancing visibility, authentication and authorization.

- * They help deliver a better user experience with in-depth network analytics to assess user, device, and application connectivity.

NEW QUESTION 26

Which characteristic could make a Virtual Mobility Controller (VMC), as opposed to a hardware controller, a good solution for a customer?

- * need for flexibility in moves and changes
- * desire to remain on pre-8.0 ArubaOS code
- * need for highest throughput
- * little communication between server and networking teams

NEW QUESTION 27

What is one reason you should recommend the Aruba 2930F rather than the Aruba 2540 at the access layer?

- * The customer needs static routing at the access layer, and the Aruba 2540 does not support any routing.
- * The customer needs Power over Ethernet (PoE+), and the Aruba 2540 does not support this feature.
- * The customer wants Smart Rate Ports, and the Aruba 2930F offers this feature.
- * The customer prioritizes scalability, and the Aruba 2930F supports Virtual Switching Framework (VSF).

NEW QUESTION 28

What is one challenge distributed enterprises face with traditional branch architecture?

- * A traditional branch architecture unifies security policies centrally, which frustrates local IT staff who do not understand the policies.
- * A traditional branch architecture does not support a WAN established over MPLS, which is the most cost-effective choice for most customers.
- * Traditional branches do not have enough separate hardware devices for customers to meet performance requirements.
- * In a traditional architecture, all branch traffic has to be routed through the datacenter to get to the Internet or the cloud.

NEW QUESTION 29

You are proposing an Aruba wired and wireless solution to a customer. After a discussion about Aruba ClearPass and IntroSpect, a member of the security team asks about security measures that go beyond software solutions.

What is one advantage of Aruba Secure Infrastructure that you should emphasize to this technical influencer?

- * Silicon root of trust creates a digital fingerprint in the silicon of ArubaOS switches to ensure they will never boot with compromised hardware.
- * Connectivity Health collects and compiles information about switch configuration, protocol, and system state and uses machine learning to compare this information to baseline figures.
- * An Aruba infrastructure reduces the likelihood traffic can be intercepted with centralized encryption and deep packet inspection.
- * Aruba controlled APs maintain a distributed policy engine that defines who and what devices can connect to which data, infrastructure, and applications.

NEW QUESTION 30

How does Aruba's unique history give an advantage to the company?

- * Aruba's vision of building from the core out comes from the company's start as a switch and router manufacturer

- * Born in the mobile, cloud, IoT era, Aruba can help customers build a secure, intelligent network from the edge in
- * Aruba has made a number of key acquisitions that have enabled it to develop five separate architectures for customers
- * Because Aruba began developing consumer-based products, its low-cost model for standalone wireless equipment makes it ideal for SMBs

NEW QUESTION 31

What is one key way that Aruba IntroSpect enhances security for a customer network?

- * It enforces role-based policies to ensure the right users connect to the right resources.
- * It provides an enhanced guest portal with user identification and tracking features.
- * It inspects all traffic and ensures that sensitive data is securely encrypted.
- * It ties security alerts to the user or device identify associated with the alert.

NEW QUESTION 32

A customer is not sure about the additional benefits of an Aruba Mobility Master (MM)-based architecture.

What is one advantage that you should emphasize?

- * Aruba MM adds built in network access control with micro-policies that enhance both security and user experience.
- * Aruba MM enables Aruba AirMatch, which better optimizes RF in dense environments than simple Adaptive Radio management (ARM).
- * Aruba Connectivity Health, which is embedded in MM, helps admins detect network issues before they cause problems.
- * Aruba mobile engagement and location-based services are powered by the software platform and app dev kit in MM.

NEW QUESTION 33

What is one advantage of the experience-driven approach to management?

- * It focuses on meeting business initiatives by improving performance, reliability, and secure network access.
- * It relies on on-prem management exclusively so customers can avoid the security vulnerabilities of cloud.
- * It relies on traditional tools that most IT admins are familiar with, such as the CLI, SNMP, and logs.
- * It focuses on break-fix tools, so that IT spends its time keeping the lights on.

NEW QUESTION 34

Which aspect of the Aruba 360 Secure Fabric uses machine learning to detect attacks and malicious behavior on the inside of the network?

- * Aruba IntroSpect
- * Aruba Mobility Master
- * Aruba ClearPass
- * Aruba VisualRF

NEW QUESTION 35

You have already determined that a customer has a distributed enterprise.

Which question will help qualify the customer for the Aruba SD-Branch solution?

- * Do you use a SIEM today, and is it satisfying your needs for scalability and attack detection?
- * Have you considered using MPLS to reduce costs?
- * How do you access cloud services, and what issues are you seeing with your current router?
- * Which branches experience the smallest and highest traffic loads?

Explanation/Reference:

NEW QUESTION 36

Which statement indicates that the customer could benefit from Aruba asset tracking capabilities?

- * Our nurses are constantly running around looking for misplaced equipment; this not only wastes time, but also negatively affects and quality of care we provide to our patients;
- * We are a growing business and we want to encourage our employees to bring their own devices, but we are not exactly sure how best to manage and onboard all of these devices;
- * We have several big machines at on our main constructions sites, a we need a process to quickly and accurately calibrate them all to help avoid any mishaps;
- * We have developed an app that our customers can download to explore the services available at our venue, but we want to enhance the app with more location-specific information;

NEW QUESTION 37

A small customer has a tight budget but needs 10 GbE uplinks.

Which HPE OfficeConnect switch should you suggest?

- * HPE OfficeConnect 1620 switch
- * HPE OfficeConnect 1820 switch
- * HPE OfficeConnect 1850 switch
- * HPE OfficeConnect 1405 switch

NEW QUESTION 38

What is one distinguishing feature of Aruba NetInsight and User-centric Service Assurance?

- * They help improve customer engagement by providing a customizable Wi-Fi portal.
- * They help to analyze customer usage patterns over a certain period of time so that companies can improve marketing campaign success.
- * They help IT to simplify policy enforcement by enhancing visibility, authentication and authorization.
- * They help deliver a better user experience with in-depth network analytics to assess user, device, and application connectivity.

NEW QUESTION 39

A mid-sized customer is having trouble deciding between in a controllerless Aruba solution and a controllerbased one. What can you explain to the customer about how Aruba protects the company's investment?

- * The same Aruba APs can be deployed in controllerless Instant mode and then later changed to controlled mode.
- * Aruba offers a buy-back program for controllerless Instant APs, making it cost effective to later deploy controlled APs.
- * There is no difference in features and capabilities between a controllerless and controller-based Aruba solution.
- * Aruba uses a cloud subscription-based licensing model for controllerless APs, and these licenses can be upgraded to controller licenses.
