What is Palo Alto PCNSC Certification Exam and Retake policy

The tests are at present PC based evaluations of information and abilities. There is different decision, coordinating and requesting questions. For definite data on singular Certification prerequisites and accessible assets to help get ready for the tests, similar to true accessible preparing, study guides, practice test, if it's not too much trouble, visit the Palo Alto Networks Certification site.

How much Palo Alto PCNSC Exam costs - No. of Questions: 30 Questions- Types of questions: Performance Based
Questions- Passing Score: 70% or higher **NO.17** Which three file types can be forward to WildMFire for analysis a part of the basic WildMFire service?

* .exe
* .apk
* .dil
* .jar

* .pdf
* .fon

NO.18 An administrator has created an SSL Decryption policy rule that decrypts SSL sessions on any port. Which log entry can the administrator use to verify that sessions are being decrypted?
* Decryption tag
* In the details of the Threat log entries
* In the details of the Traffic log entries
* Data filtering log

NO.19 A web server is hosted in the DMZ and the server re configured to listen for income connections on TCP port

443. A Security policies rules allowing access from the Trust zone to the DMZ zone needs to be configured to allow web-browsing access. The web server host its contents over Traffic from Trust to DMZ is being decrypted with a Forward Proxy rule.

Which combination of service and application, and order of Security policy rules needs to be configured to allow cleaned web-browsing traffic to the server on tcp/443?
* Rule# 1 application: ssl; service application-default: action allow

Role # 2 application web browsing, service application default, action allow
* Rule #1application web-browsing, service service imp action allow

Rule #2 application ssl. service application -default, action allow
* Rule#1 application web-brows.no service application-default, action allow Rule #2 application ssl. Service application-default, action allow
* Rule#1application: web-biows.no; service service-https action allow

Rule#2 application ssl. Service application-default, action allow

NO.20 A global corporate office has a large-scale network with only one User-ID agent, which creates a bottleneck near the User-ID agent server. Which solution in PAN -OS software would help in this case?
* content inspection
* application override
* Virtual Wire mode
* redistribution of user mappings

NO.21 An administrator encountered problems with inbound decryption. Which option should the administrator investigate as part of triage?
* firewall connectivity to a CRL
* Root certificate imported into the firewall with “Trust” enabled
* importation of a certificate from an HSM
* Security policy rule allowing SSL to the target server

NO.22 A session in the Traffic log is reporting the application as “incomplete” What does “incomplete” mean?
* The three-way TCP handshake did not complete.
* Data was received but wan instantly discarded because of a Deny policy was applied before App ID could be applied.
* The three-way TCP handshake was observed, but the application could not be identified.
* The traffic is coming across UDP, and the application could not be identified.

NO.23 Which User-ID method should b configured to map addresses to usernames for users connected through a terminal server?

* XFF header
* Client probing
* port mapping
* server monitoring

NO.24 Which two subscriptions are available when configuring panorama to push dynamic updates to connected devices? (Choose two.)

* User-ID
* Antivirus
* Application and Threats
* Content-ID

NO.25 Which Captive Portal mode must be contoured to support MFA authentication?

* Single Sign-On
* Redirect
* Transparent
* NTLM

NO.26 A Security policy rule is configured with a Vulnerability Protection Profile and an action of Deny”.

Which action will this configuration cause on the matched traffic?
* The configuration is invalid it will cause the firewall to Skip this Security policy rule A warning will be displayed during a command.
* The configuration is valid It will cause the firewall to deny the matched sessions. Any configured Security Profiles have no effect if the Security policy rule action is set to “Deny” The configuration will allow the matched session unless a vulnerability signature is detected. The “Deny” action will supersede the per. defined, severity defined actions defined in the associated Vulnerability Protection Profile.
* The configuration is invalid. The Profile Settings section will be- grayed out when the action is set to “Deny”

NO.27 Which option would an administration choose to define the certificate and protect that Panorama and its managed devices uses for SSL/ITS services?
* Set Up SSL/TLS under Policies > Service/URL Category > Service.
* Configure on SSL/TLS Profile.
* Configure a Decryption Profile and select SSL/TLS services.
* Set up Security policy rule to allow SSL communication.

NO.28 Which three authentication faction factors does PAN-OS software support for MFA? (Choose three.)

* Voice
* Pull
* SMS
* Push
* Okta Adaptive

NO.29 A firewall administrator has been asked to configure a Palo Alto Networks NGFW to prevent against compromised hosts trying to phone-number or bacon out to eternal command-and-control (C2) servers.

Which Security Profile type will prevent these behaviors?
* Vulnerability Protection
* Antivirus

* Wildfire
* Anti-Spyware

NO.30 What should an administrator consider when planning to revert Panorama to a pre-PAN-OS 8.1 version?
* When Panorama is reverted to an earlier PAN-OS release, variable used in template stacks will be removed authentically.
* Panorama cannot be reverted to an earlier PAN-OS release if variables are used in templates or stacks.
* An administrator must use the Expedition tool to adapt the configuration to the pre-pan-OS 8.1 state.
* Administrators need to manually update variable characters to those to used in pre-PAN-OS 8.1.

NO.31 In High Availability, which information is transferred via the HA data link?
* heartbeats
* HA state information
* session information
* User-ID information

NO.32 An administrator creates a custom application containing Layer 7 signatures. The latest application and threat dynamic update is downloaded to the same NGFW. THE update contains application that matches the same traffic signatures as the customer application.

Which application should be used to identify traffic traversing the NGFW?
* custom application
* Custom and downloaded application signature files are merged and are used
* System longs show an application errors and signature is used.
* downloaded application

NO.33 Which prerequisite must be satisfied before creating an SSH proxy Decryption policy?
* No prerequisites are required
* SSH keys must be manually generated
* Both SSH keys and SSL certificates must be generated
* SSL certificates must be generated

NO.34 A user’s traffic traversing a Palo Alto Networks NGFW sometime can reach http//www company com At the session times out.

The NGFW has been configured with a PBF rule that the user’s traffic matches when it goes to http //www company com.

How con the firewall be configured to automatically disable the PBF rule if the next hop goes down?
* Configure path monitoring for tine next hop gateway on the default route in tin- virtual router.
* Enable and configure a Link Monitoring Profile for the external interface of the firewall.
* Create and add a Monitor Profile with an action of Wait Recover in the PBF rule in question.
* Create and add a Monitor Profile with an action of Fail Over in the PBF rule in question.

NO.35 A customer wants to combine multiple Ethernet interfaces into a single virtual interface using Link aggregation.

Which two formats are correct for naming aggregate interlaces? (Choose two.)
* aggregate.8
* ae.8
* ae.1
* aggregate.1

NO.36 Which three options are supposed in HA Lite? (Choose three.)

* Configuration synchronization

* Virtual link

* active/passive deployment

* session synchronization

* synchronization of IPsec security associations

NO.37 Which three user authentication services can be modified in to provide the Palo Alto Networks NGFW with both username and role names? (Choose three.)

* PAP

* SAML

* LDAP

* TACACS+

* RADIUS

* Kerberos

NO.38 Which method will dynamically register tags on the Palo Alto Networks NGFW?

* Restful API or the VMware API on the firewall or on the User.-D agent or the ready -only domain controller

* XML API or the VMware API on the firewall on the User-ID agent or the CLI

* Restful API or the VMware API on the firewall or on the User-ID Agent

* XML- API or lite VM Monitoring agent on the NGFW or on the User- ID agent

Who should take the Palo Alto PCNSC Exam

Anybody keen on showing information, expertise and capacities with Prisma Cloud including cloud security, client achievement, DevOps, cloud support, proficient administrations and Appsec engineers, network safety planners, and group leads.
