[2022 ACP-610 Dumps are Available for Instant Access Valid ACP-610 Dumps for Helping Passing ACP-610 Exam! QUESTION 23

Users typically forget to add components when they create new issues. As a result, most of the newly created issues get assigned to Tom, who is the project lead.

Tom reviews all of the issues, and wants to triage them based on component selection. But when he edits an issue and adds a component, the assignee does not change.

Why does the assignee not change when adding a component to an issue?

- * Auto-assignment with components only works when creating issues.
- * The project's default assignee overwrites the value of the component lead.
- * The default assignee of the selected components is set to Project default.
- * The Assignee field additionally needs to be changed to Automatic.
- * The selected components do not have a component lead set.

QUESTION 24

Analyze the workflow scheme for the SSP project shown below:

Workflow	Issue Types
Software Simplified Workflow for Project SSP (View as text)	 Story  Epic  Task  Sub-task (Assign)
classic default workflow (View as text)	 Bug (Assign)

Which change would require an update to the workflow scheme?

- * Sub-task and Bug need a different set of statuses.
- * Task and Sub-Task need a different screen when being edited.
- * Story and Epic need a different set of statuses.
- * Story and Task need a different screen when being created.

QUESTION 25

You manage multiple projects which share a notification scheme. For the Issue Moved event, you want to notify only a particular individual. That individual needs to be selected by other users.

Which value should be used for the Issue Moved event?

- * Single User
- * Developers project role
- * User Custom Field Value
- * Current User
- * Component Lead
- * Single Email Address

QUESTION 26

Your coworkers, Jill and Dave, want you to create a filter and a corresponding filter subscription to run every morning at 8 AM.

For the query result, they each want to receive a list of only their own issues that were assigned to them in the last 8 hours.

Which JQL query will you use in the filter?

- * assignee in (Jill,Dave) AND created >= -8h
- * assignee changed TO currentUser() AFTER startOfDay()
- * assignee changed TO currentUser() >= -8h
- * assignee changed TO (Jill,Dave) >= -8h
- * assignee = Jill OR assignee = Dave AND created AFTER startOfDay()

QUESTION 27

Martina is unable to perform the following actions in the App project:

• Create and manage versions

• Create and manage components

• Rank issues in the backlog

The App project does not use a shared permission scheme.

Which two permissions will allow her to perform those actions? (Choose two.)

- * Transition Issues
- * Move Issues
- * Administer Projects
- * Bulk Change
- * Schedule Issues

QUESTION 28

Your development team has just released their first version of a GPS tracker yesterday. The next product release is not due for another 3 months.

Which two JQL queries, when executed today, will list all features shipped in the 1.0 version? (Choose two.)

- * project = GPS AND issuetype = Feature AND fixVersion = released()
- * project = GPS AND type = Feature AND fixVersion in (1.0)
- * project = GPS AND issuetype = Feature AND fixVersion(s) IS NOT EMPTY
- * project = GPS AND type = Feature AND fixVersion in releasedVersions()
- * project = GPS AND type = Feature AND fixVersion(s) = “1.0”
- * project = GPS AND issuetype = Feature AND fixVersion in 1.0

QUESTION 29

You need a new project to track Software Defects.

The entire setup should be identical to the Hardware Defect project.

You ask your Jira administrator to create a new project with a shared configuration, and use the Hardware Defect project as the source.

Which three elements will you need to manually configure to achieve an identical setup? (Choose three.)

- * Project description
- * Security levels
- * Screens
- * Components
- * Versions
- * Priorities

QUESTION 30

Max and Emma both have Jira Software application access, and they are members of the same groups and project roles in the DEV project.

However, Max can rank issues on the project's Kanban board, while Emma cannot.

Which configuration will definitely explain the observed behavior?

- * Max and Emma have different global permissions.
- * Only Max has a valid Jira Software license.
- * Only Max is a project administrator of the DEV project.
- * Max and Emma are associated with different security levels.
- * Only Max has been granted the Schedule Issues permission in the DEV project.
- * Max is a component lead and Emma is a project lead in the DEV project.

QUESTION 31

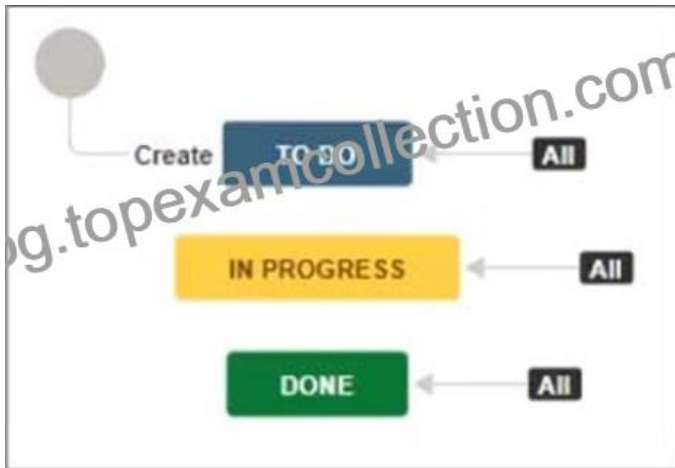

You need a way to put issues On Hold.

Additionally you need to filter for all issues that:

• were put On Hold by user Dave

• were put On Hold in the last 30 days

The current workflow is shown below:

Which combination of configuration items will meet the requirements?

- * Status, screen
- * Status, transitions
- * Transition, custom field (User Picker)
- * Transition, post-function
- * Screen, custom field (Date picker)

QUESTION 32

Teresa is able to see the Start Progress transition but not the Approve transition on an issue. Her co-worker is able to see both.

Identify two possible causes why Teresa can NOT see the Approve transition. (Choose two.)

- * Teresa is not listed in the correct security level for the issue.
- * Teresa does not have the Transition Issues permission.
- * Teresa is not in the correct group or project role.
- * Teresa does not meet the condition on the Approve transition.
- * Teresa does not have the correct global permission.
- * Teresa does not have the correct Application access.

QUESTION 33

Nadav wants to know how accurate estimates were on issues associated with version 2.2.

Which report should he use?

- * Time Since Issues Report
- * Resolution Time Report
- * User Workload Report
- * Version Workload Report
- * Time Tracking Report
- * Single Level Group By Report

QUESTION 34

Malik is a project administrator for the HR project. He cannot remove the Fix Version/s field from the HR project screen.

Why is he NOT able to do this?

- * Fix Version/s for the project have been archived.
- * The Fix Version/s field is locked.
- * The screen is used by another project.
- * System fields cannot be removed from screens.
- * Fix Version/s is a required field.

QUESTION 35

You are the project administrator handling configuration changes requested by the users. Whenever possible, you want to handle the changes yourself without involving the Jira administrator.

Which two changes might be possible for you to handle yourself? (Choose two.)

- * The priority value Highest is not needed in the project.
- * Watchers should only receive a notification when an issue is being resolved.
- * Sam Smith should have the same permissions as Dwayne Johnson.
- * Only QA managers should be able to bulk-edit issues in the project.
- * Only certain users should be able set the TOP SECRET issue security level.

QUESTION 36

In my project, I can create issues and assign them to other users.

However, the other users are not able to assign issues to me.

What are two possible reasons for this? (Choose two.)

- * I am not a component lead.
- * I do not have the Assignable User permission.
- * The other users do not have the Assignable User permission.
- * The other users do not have the Edit Issues permission.
- * The other users do not have the Assign Issues permission.

QUESTION 37

A project administrator wants to modify his project screen. The project screen meets all the prerequisites for him to be able to edit it.

Which two actions can he NOT perform? (Choose two.)

- * Remove a field
- * Rename a tab
- * Make a field required
- * Rearrange existing fields
- * Create a new field
- * Move a tab

QUESTION 38

Fixing a single bug requires the involvement of three teams: Designers, Developers and Testers.

Currently, all the fields that are needed by each of the three teams are together on a single project screen.

As a project administrator, how can you help the teams to easily identify the fields they need?

- * Request a separate issue type and issue type scheme for each team.
- * Use the card colors feature to color-code the fields by team.
- * Make fields available only for the team that needs them.
- * Request individual team screens to be associated with the Edit Issue operation.
- * Group individual fields by team and place them on separate tabs.

QUESTION 39

You are helping a manager to translate business requirements into a Jira project configuration. The manager wants users to indicate which systems are impacted by a bug. You are unsure if systems should be configured as components or as a custom field.

Select two situations in which components must definitely be used rather than a custom field. (Choose two.)

- * Assignee must be set based on the selected system.
- * Users must be able to select multiple systems.
- * Systems must be required on the screen.
- * Systems must be managed by project administrators.
- * Systems must be exportable to CSV.
- * Systems must have a default value.
