

## Best H13-811\_V3.0 Exam Dumps for the Preparation of Latest Exam Questions [Q59-Q75]

### Best H13-811\_V3.0 Exam Dumps for the Preparation of Latest Exam Questions H13-811\_V3.0 Actual Questions 100% Same Braindumps with Actual Exam! QUESTION 59

Which of the following is not a capability of the software development cloud?

- \* Compile and build
- \* data backup
- \* Code check
- \* Project management

#### QUESTION 60

When registering a private image with the image file, the capacity of the system disk filled in is less than the capacity of the system disk inside the image file, which will cause the image creation to fail.

- \* True
- \* mistake

#### QUESTION 61

What kinds of private images can be created?

- \* System disk mirroring
- \* Market mirroring
- \* Data disk mirroring
- \* Whole machine mirror

### QUESTION 62

Relational database MySQL instance backup support recovery to which of the following?

- \* New instance
- \* Current instance
- \* Existing examples
- \* none of the above

### QUESTION 63

Regarding the description of object storage service billing, which of the following is correct?

- \* There is no charge for retrieving data
- \* Every data stored in OBS needs to be charged
- \* Public network outgoing traffic needs to be billed
- \* Intranet outgoing traffic will not incur costs

### QUESTION 64

What types of protocols does the elastic load balancing system support?

- \* HTTPS
- \* TCP
- \* UDP
- \* HTTP

### QUESTION 65

The CIFS file system supports mounting on cloud servers using the Linux operating system.

- \* True
- \* mistake

### QUESTION 66

Host monitoring supports monitoring of cloud servers and bare metal servers.

- \* True
- \* False

### QUESTION 67

What can I do if the disk capacity of the elastic cloud server is insufficient?

- \* Reinstall the operating system
- \* Expand the disk
- \* Unmount disk
- \* Switch operating system

### QUESTION 68

Which statement about Anti-DDos traffic cleaning is wrong?

- \* Provides public IP protection against elastic cloud hosts and load balancing devices
- \* Provide monitoring capability to view a single public network IP, Including current protection status, current protection configuration parameters, traffic conditions from 24 hours ago to the present, 2 hours of abnormal events
- \* Possess Web vulnerability security detection capabilities
- \* Provide configuration and modification for public network IP Anti-DDos Ability to correlate parameters

### QUESTION 69

Call AP I Which of the following security authentication methods are there?

- \* Huawei I AM certification
- \* No certification
- \* APP authentication
- \* Micro authentication

### QUESTION 70

How does the elastic cloud server construct a logically completely isolated network area?

- \* Elastic scaling
- \* Virtual private cloud
- \* Cloud audit
- \* Cloud container engine

### QUESTION 71

What are the ways to create a private image?

- \* Created by cloud server
- \* Created by OBS file
- \* Created by external image file
- \* Created by physical server

### QUESTION 72

Which of the following are the basic characteristics of cloud computing?

- \* On-demand self-service
- \* Fast elastic scaling
- \* Resource pooling
- \* Broad network access

### QUESTION 73

What does the elastic cloud server use to store data?

- \* Dedicated cloud
- \* Elastic scaling
- \* Mirroring
- \* Cloud hard drive

#### QUESTION 74

When creating a scaling configuration, What are the options for configuration templates?

- \* Use existing cloud server specifications as a template
- \* Use an existing image as a template
- \* Use shared templates
- \* Use new template

#### QUESTION 75

Cyber security as an important component of cloud security services, Achieve network isolation, Responding to cyber attacks, Ensure network security.

- \* True
- \* mistake
