Free PL-900 Test Questions Real Practice Test Questions

Information related to time duration, number of questions, passing score and languages of the PL-900 Exam is as follow:

Minimum score to pass the exam: 700/1000
Time duration of the PL-900 Exam: 60 minutes
Language: English, Spanish, Chinese (Simplified), French, Japanese, Portuguese (Brazil), Arabic (Saudi Arabia), Chinese (Traditional), Italian, German, Korean, Russian.
Number of questions in the PL-900 Exam: 40 - 60

Schedule exam Languages: English, Spanish, German, Chinese (Simplified), French, Korean, Japanese, Portuguese (Brazil), Russian, Arabic (Saudi Arabia), Chinese (Traditional), Italian

Retirement date: none

This exam measures your ability to describe the business value of Power Platform; identify the core components of Power Platform; demonstrate the capabilities of Power BI; describe the capabilities of Power Apps; demonstrate the capabilities of Power Automate; and demonstrate the business value of Power Virtual Agents.

NEW QUESTION 124

You are building Power Apps apps that use both Dynamics 365 Sales and Microsoft 365.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes

No

Dynamics 365 Sales and Microsoft 365 must be in the same tenant to allow Single Sign-On (SSO).

You must download a product from AppSource to ensure that SSO works with Dynamics 365 Sales and Microsoft 365.

Components

Answer Area

Requirement

- Display a single record from Common Data Service.
- Display a list of records from a Microsoft SharePoint list.
- Display a list of records from Common Data Service.

Explanation

Statement

Yes

No

Dynamics 365 Sales and Microsoft 365 must be in the same tenant to allow Single Sign-On (SSO).

You must download a product from AppSource to ensure that SSO works with Dynamics 365 Sales and Microsoft 365.

Box 1: No

When you offer your application for use by other companies through a purchase or subscription, you make your application available to customers within their own Azure tenants. This is known as creating a multi-tenant application.

Box 2: No

NEW QUESTION 125

A project deadline is approaching. The project manager reports that there are still a number of critical tasks that are not complete.

You need to implement Power Automate to help streamline processes.

Which types of flows should you use? To answer, drag the appropriate flow types to the correct requirement.

Each flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Flow types	Requirement	Flow type
automated	Ensure that all of the steps for completing tasks are consistently followed by all team members.	
instant	Allow users to send an email to the project lead whenever a task is completed.	
scheduled	Automatically send a list of completed tasks at the end of each week.	
business process		

Processes	Answer Area	Step	Process
Select an app from the Power Apps		1	Select an app from the Power Apps
Select the app and select a security		2	Select Share.
Select a user and choose a security		3	Select the app and select a security
Select Share.		4	Select a user and choose a security

Explanation

Requirement	Flow type
Ensure that all of the steps for completing tasks are consistently followed by all team members.	business process
Allow users to send an email to the project lead whenever a task is completed.	automated
Automatically send a list of completed tasks at the end of each week.	scheduled

NEW QUESTION 126

You are creating a Power Automate flow.

You need to retrieve data from several sources including Microsoft Excel, Azure Data Lake, and GitHub.

What should you use? To answer, drag the appropriate components to the correct data sources. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

The image shows two screenshots of a Power Automate component selection interface. The first screenshot shows the 'Components' pane on the left with three items: Connector, Expression, and Formula. The 'Answer Area' in the center has a 'Data source' section with three items: Microsoft Excel, Azure Data Lake, and GitHub. To the right is an empty 'Component' pane. The second screenshot shows the same 'Components' and 'Answer Area' panes, but the 'Component' pane now contains three items: Formula, Connector, and Expression. A watermark 'blog.topexamcollection.com' is visible across both screenshots.

Explanation

The image shows a screenshot of the Power Automate component selection interface. The 'Components' pane on the left has three items: Connector, Expression, and Formula. The 'Answer Area' in the center has a 'Data source' section with three items: Microsoft Excel, Azure Data Lake, and GitHub. To the right is a 'Component' pane containing three items: Formula, Connector, and Expression. A watermark 'blog.topexamcollection.com' is visible across the screenshot.

NEW QUESTION 127

A company is evaluating ways to connect Power Platform apps to external services to perform complex activities. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statement	Yes	No
You can create a canvas app that scans and parses documents using Azure Cognitive Services and then adds the appropriate information to Dynamics 365 Sales.	<input type="radio"/>	<input type="radio"/>
You can create a canvas app that uses Azure Cognitive Services to read incident records and identify tickets that need to be escalated based on sentiment score.	<input type="radio"/>	<input type="radio"/>

Answer Area

Statement	Yes	No
You can create a canvas app that scans and parses documents using Azure Cognitive Services and then adds the appropriate information to Dynamics 365 Sales.	<input checked="" type="radio"/>	<input type="radio"/>
You can create a canvas app that uses Azure Cognitive Services to read incident records and identify tickets that need to be escalated based on sentiment score.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 128

Your company wants to create a help desk system and implement Dynamics 365 Customer Service.

The company has the following requirements:

- * Provide an application to allow support team staff to chat live with a customer.
- * Automatically import data from a Microsoft Excel spreadsheet once a day.
- * Provide a chatbot that can assist customers who need support.

You need to determine which applications to use to meet the requirements.

Which applications should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Application
Automatically import data from a Microsoft Excel spreadsheet once a day.	<input type="text" value=""/> Custom Connector Azure Data Lake Power Automate Power BI
Provide a chatbot that can assist customers who need support.	<input type="text" value=""/> Power Virtual Agent Power Automate

Statement	Yes	No
You can embed a canvas app in a Microsoft Forms form to collect user feedback.	<input type="radio"/>	<input type="radio"/>
You can embed a canvas app within a Microsoft Excel worksheet to allow users to interact with data in a structured way.	<input type="radio"/>	<input type="radio"/>
You can embed a canvas app within a Power Platform model-driven app.	<input type="radio"/>	<input type="radio"/>

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

Requirement	Application
Automatically import data from a Microsoft Excel spreadsheet once a day.	<ul style="list-style-type: none">Custom ConnectorAzure Data LakePower AutomatePower BI
Provide a chatbot that can assist customers who need support.	<ul style="list-style-type: none">Power Virtual AgentPower Automate

NEW QUESTION 130

An organization plans to create Power Platform solutions and is evaluating Microsoft Dataverse.

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

	Yes	No
Virtual table data is stored in Microsoft Dataverse.	<input type="radio"/>	<input type="radio"/>
Columns are used in forms and views.	<input type="radio"/>	<input type="radio"/>
	Yes	No
Virtual table data is stored in Microsoft Dataverse.	<input type="radio"/>	<input checked="" type="radio"/>
Columns are used in forms and views.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation

Graphical user interface, text Description automatically generated with medium confidence

	Yes	No
Virtual table data is stored in Microsoft Dataverse.	<input type="radio"/>	<input checked="" type="radio"/>
Columns are used in forms and views.	<input checked="" type="radio"/>	<input type="radio"/>

Box 1: No

A virtual table is a definition of a table in the Dataverse platform without the associated physical tables for table instances created in the Dataverse database. Instead during runtime, when a table instance is required, its state is dynamically retrieved from the associated external system.

Box 2: Yes

Columns in forms: In the form designer, drag any columns from the Columns Explorer into the section on the form.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/virtual-entities/get-started-ve>

NEW QUESTION 131

You create a model-driven app.

The app is ready to be shared.

You need to complete the process required to set the app up to be shared.

How should you complete the process for setting up the app to be shared? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Processes

- Select an app from the Power Apps
- Select the app and select a security
- Select a user and choose a security
- Select Share.

Answer Area

blog.topexamcollection.com

Step

Process

1	Process
2	Process
3	Process
4	Process

Processes

- Select an app from the Power Apps
- Select the app and select a security
- Select a user and choose a security
- Select Share.

Answer Area

blog.topexamcollection.com

Step

Process

- 1 Select an app from the Power Apps
- 2 Select Share.
- 3 Select the app and select a security
- 4 Select a user and choose a security

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/share-model-driven-app>

NEW QUESTION 132

You create reports within Power BI to report on the status of a project. A manager asks you to share the reports with other team members. You decide to create a published app and set permissions to allow other team members to view the reports.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement

Yes

No

The Power BI published app is stored within the Team site so that others can install it.

One of the other project managers installs and modifies a dashboard within the Power BI published app. The changes are automatically made into the original published app.

Statement

Yes

No

The Power BI published app is stored within the Team site so that others can install it.

One of the other project managers installs and modifies a dashboard within the Power BI published app. The changes are automatically made into the original published app.

NEW QUESTION 134

You are building a Power Virtual Agents chatbot for a company.

You are working with an existing topic and would like to call an action.

Which technology is available to perform the action?

- * Power Virtual Agent Entity
- * Power Apps
- * Power Automate
- * Power BI

NEW QUESTION 135

A company plans to create Power Platform apps that consume industry-standard and proprietary data sources.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
Custom connector cannot be used if a standard connector for the service is available.	<input type="radio"/>	<input type="radio"/>
Custom connectors are supported in instant flows only.	<input type="radio"/>	<input type="radio"/>
Standard and custom connectors cannot be mixed within the same flow or app.	<input type="radio"/>	<input type="radio"/>

Statement	Yes	No
Custom connector cannot be used if a standard connector for the service is available.	<input checked="" type="radio"/>	<input type="radio"/>
Custom connectors are supported in instant flows only.	<input type="radio"/>	<input checked="" type="radio"/>
Standard and custom connectors cannot be mixed within the same flow or app.	<input checked="" type="radio"/>	<input type="radio"/>

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/connections-list>

NEW QUESTION 136

A company uses Dynamics 365 Supply Chain Management.

The company wants to build customer user interfaces that add additional functionality.

You need to recommend a solution for the company.

What should you recommend?

- * Power BI
- * Power Apps canvas apps
- * AI Builder
- * Microsoft Flow

Section: Demonstrate the business value of Power Apps

Explanation:

Microsoft Power Apps provides a consistent experience for building apps and extending Office 365 and Dynamics 365. Investments include enhancements on Unified Interface, support for embedding canvas apps in model-driven apps and native support of the Common Data Service for Apps.

Reference:

<https://powerapps.microsoft.com/en-us/roadmap/>

NEW QUESTION 137

You create a canvas app by using the Generate from data feature. The app connects to a Microsoft SharePoint list.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
A screen is generated that contains a browsable list of SharePoint list items.	<input type="radio"/>	<input type="radio"/>
A screen is generated that allows users to update SharePoint list items.	<input type="radio"/>	<input type="radio"/>

Statement	Yes	No
A screen is generated that contains a browsable list of SharePoint list items.	<input checked="" type="radio"/>	<input type="radio"/>
A screen is generated that allows users to update SharePoint list items.	<input checked="" type="radio"/>	<input type="radio"/>

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/app-from-sharepoint>

NEW QUESTION 138

A company is building a model-driven app.

You need to create and configure the objects needed for the app.

Which component categories should you use? To answer, drag the appropriate component categories to the correct objects. Each component category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Component categories	Answer Area	Component category
UI	Object: Relationship	
Data	Form	
Logic	Business rule	
Visualization	View	

Flow types	Answer Area	Flow type
automated	Description: a flow that runs after it is triggered by an event	automated
business process	a flow that guides a user through a set of tasks	business process
scheduled	a flow that runs after a specified number of days	scheduled
instant	a flow that allows you to start tasks on demand	instant

Explanation

Object	Component category
Relationship	Data
Form	UI
Business rule	Logic
View	UI

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/model-driven-app-components>

NEW QUESTION 139

You are building a Power Automate flow to manage sales.

The sales team saves quotes as PDF files to a Microsoft OneDrive folder. You create a Microsoft SharePoint list to help the sales team manage follow ups to quotes. You need to copy the customer name, phone number, and the amount of the potential sale from the sales quote and insert the data into the SharePoint list. Which AI Builder model should you use?

- * key phrase extraction
- * sentiment analysis OC.
- * text recognition
- * language detection

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognition>

NEW QUESTION 140

A company plans to implement Power Apps in a Power Platform environment.

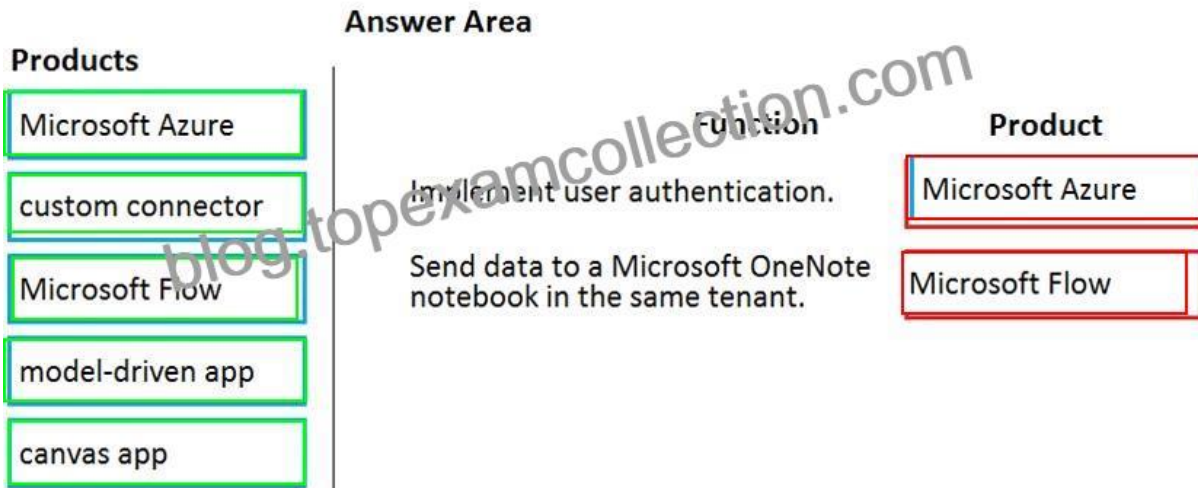

You need to implement other required components.

Match each option to its function. To answer, drag the appropriate option from the column on the left to its function on the right. Each option may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Answer Area

Products	Function	Product
Microsoft Azure	Implement user authentication. Send data to a Microsoft OneNote notebook in the same tenant.	<input type="text"/>
custom connector		<input type="text"/>
Microsoft Flow		
model-driven app		
canvas app
