Pass Exam Questions Efficiently With RCDDv14.1 Questions (2023)
RCDDv14.1 Questions - Truly Beneficial For Your BICSI Exam

BICSI RCDDv14.1 Certification Exam is ideal for individuals who work in the telecommunications industry, including network designers, project managers, and engineers. BICSI Registered Communications Distribution Designer certification helps individuals demonstrate their expertise in network design and implementation, which can lead to career advancement opportunities and higher salaries. Additionally, the certification program provides individuals with access to a global network of professionals, which can be beneficial in terms of networking and career development.

Q27. The new performance financial system is delivered lo all business entities on time following a one-year implementation program After six months of utilization the global finance department one of the main beneficiaries of the program, determines that quality and level of granularity of the financial data is not sufficient for them to analyze the key performance indicators (KPIs) defined Additionally, the global finance department is missing the analytical tools required to understand the causes of discrepancies To address these shortcomings the global finance department submits a request for a follow-up initiative through the process defined by which of the following documents?
* Benefits sustainment plan

* Benefits governance plan
* Benefits realization report
* Benefits transition plan

Q28. The program manager compiles a program performance report for review by the program governance board. The performance report indicates that the scope, quality and schedule objectives have been me, but costs and resource utilization are higher than expected The program can no longer deliver the planned return-on-investment within an acceptable level and the intended benefits have not yet been realized After further analysis of the performance indicators the program manager should do which of the following*?
* Extend the schedule to reduce costs and resource utilization
* Expand the scope and continue the program until return on investment objectives can be met
* Recommend cancellation of the program based on performance metrics
* Transition the existing program results to the appropriate operational area

Q29. Program manager B leaves the program and program manager A takes over the program responsibilities Program manager A wants to ensure that all expected benefits of the program are realized.

What is used to assess the program cost/benefit justification?
* Program charter
* Benefits management plan
* Program business case
* Program scope statement

Q30. A program to implement a new payroll processing system at a healthcare company is nearing completion and is under budget. What should the program manager do next?
* Request permission from the program governance board to initiate program closure activities
* Present additional opportunities to the program sponsor
* Apply the remaining budget to operational activities
* Apply the remaining budget to deferred enhancement requests

Q31. A new program component provides an opportunity to enhance program outcomes. What does the program manager use to document and monitor the opportunity’?
* Program risk register
* Program scope management plan
* Program risk management plan
* Component project risk registers

Q32. A program is developing a next-gene ration product line, and one component has been delivered. However, due to a change request, expectations for another component are unmet What activity should the program manager perform next?
* Program delivery management
* Resource Interdependency management
* Program performance monitoring and controlling
* Benefits sustainment and program transition

Q33. For the MAXIMUM flexibility of a cabling system in a hierarchical star topology, ALL backbone cables and links to FR’s should be terminated at the
* HC (FD).
* IC (BD).
* TR
* MC (CD)

Q34. An organization is embarking on a new program aligned with its strategic objectives The new program has a High level of risk due to the rapidly changing technical landscape in which the organization operates The organization has mature program management capabilities, as measured by its resources, intellectual assets, and management processes.

Given the organization's history of delivering successful programs, what should the program manager do as part of the planning process?
* Interview the program managers and stakeholders of previous programs to learn from their experiences.

* Conduct stakeholder interviews to address their concerns and expectations
* Identify a list of projects, and then assign them suitable project managers

Q38. Which two of the following are included in the ICT distribution designer's role of vendor and contractor coordination'? (Select two options.)
* Conduct final ICT inspections to ensure standard and code compliance, design intent, and/or client requirements are met.
* Monitor project schedule for delays

* Produce ICT closeout documentation for the owner to provide the record documentation of the installation
* Communicate status to stakeholders
* Assist in the resolution of unforeseen conditions, change orders. RFIs, and changes to the project’s critical path

Q39. A large international manufacturing company is centralizing its IT which is currently spread over 16 countries. The transition means physically regrouping the infrastructure and aligning processes and organizations The high-level scope of this transformation encompasses three main areas.

1. The technology area-assessing which technology/tooling should be retained for the target data center

2. The policies and procedure area-aimed at establishing a common set of processes supporting the new way of delivering services

3. The HR area-assuring the new organization best fits the diversity of the countries and functional domains, while offering equivalent compensations for comparable functions You have selected your team and you are preparing the business case to support 1) the team selections you made and 2) your recommendation to proceed to the program’s next phase Which document should be present m your business case?
* A detailed plan showing dependencies among the constituent protects
* A comprehensive analysis of the different compensation packages offered in the 16 countries
* An inventory detailing all physical and logical components in place and the employees in scope
* A cost/benefit analysis of the different scenarios, presenting their respective contributions

Q40. Near the completion of a transformation program, the operations manager is concerned that their department failed lo be notified in advance of the new service being transitioned into operations. They claim that their department did not approve this service and is now unprepared and untrained to support the transformation.

What should the program manager have done first to prevent this?
* Added the operations manager as a key stakeholder
* Created a transition plan during the planning phase for the impacted operational area
* Ensured there was a communications management plan that included the transition to operations
* Drafted a training plan with assistance from the program management office (PMO) or human resource department before transitioning it to operations

Q41. A program manager concurrently implements a software program at four client locations. The client’s objective is to maintain quality while shortening the software implementation timeline What key elements should be included in the benefits register to achieve this goal?
* Plans for tracking and communicating risks associated with the program
* Plans for conducting program quality assurance and control on a regular basis
* Plans for program schedule control to meet the shorter timeline
* Plans for defining metrics and key performance indicators (KPIs), and procedures to measure benefits

Q42. Which of the following two items are examples of items associated with a submittal? (Select two options.)
* Request tor permits
* As-built
* Shop Drawings
* Product Data
* Punch List

Q43. Smaller buildings with a serving area larger than 1000 ft2 and less than 5000 ft2 may be served by:
* self-contained cabinets.
* wall cabinets.

* shallow rooms.
* enclosed cabinets.

Q44. What is the MAXIMUM number of work areas served by a single Multiuser Telecommunications Outlet Assembly (MUTOA)?
* 18
* 12
* 10
* 5

Q45. Alter an organization initiates a strategic program several project managers express interest in joining the program Team. The program manager's supervisor recommends a list of project managers to be part of the team What should the program manager do to select the project managers"
* Complete a skill set inventory and select the most suitable resource(s)
* Ask interested project managers for their CV or resume and conduct Interviews
* Accept the recommendation of the program manager's supervisor
* Contact the human resource manager tor project managers' availability

Q46. The number of emerging risks increases in a component project and the program manager tails behind in reviewing) and approving the plans. This Impacts the component project manager's ability to effectively address the risks.

In this situation, what should the program manager change about the risk management plan?
* Allow the component project manager to delegate risk management responsibilities
* Assign the resolution of project-level risks to the component project manager
* Include risk escalation policies and procedures in the risk response plan
* Increase flexibility with risks that require a risk response

Q47. A program manager initiates a developmental program. Significant resources and funding are required (or early activities until the program cost and budget estimates are complete What should the program manager do to understand the financial environment?
* Map costs to the expected benefits realization
* Establish intermediate budget based on historical information
